

第8回知的財産翻訳検定試験<第5回和文英訳>第2級
【標準解答】

Claims

1. An in-vehicle mobile phone holding device, comprising:
 - a base to be installed in a compartment of a vehicle;
 - a receptacle holder for receiving a bottom portion of a mobile phone;
 - and
 - a flexible support arm through which the holder is connected to the base.

2. The in-vehicle mobile phone holding device of Claim 1, wherein the flexible support arm includes a rod made of a soft synthetic resin and a core made of a soft metal and sheathed in the rod.

3. The in-vehicular mobile phone holding device of Claim 1 or 2, further comprising:
 - contact terminals provided in the holder and contactable with power terminals of the mobile phone;
 - a connector cord extending through the support arm and connected at one end thereof to the contact terminals; and
 - a charger connected to the other end of the connector cord and connectable to a vehicular power supply.
